T'UNG LIAO METALLURGICAL PLANT SEARCH

An extensive search was made of an area within a 30 mile radius of T'ung Liao, Communist China, to locate a highly secured metallurgical industry, such as a uranium metals plant, which would use hydrofluoric acid.

The search revealed no industry which could be identified as a metallurgical facility. There were several unidentified industries on the eastern outskirts of T'ung Liao, but none had the characteristic facilities of metallurgical plants or had more than the usual amount of security.
